## Bike Walk Central Corridor Action Plan

The City of Saint Paul is beginning work on a Central Corridor bicycle and pedestrian plan!

The plan will provide a strategy for creating a safe and inviting pedestrian and bicycle environment in Saint Paul's Central Corridor. It will identify the primary network for pedestrian and bicycle movement and make recommendations for route treatments, support facility locations, and safety measures to encourage walking and biking to and around the future light rail transit stations. In addition, the plan will prioritize achievable projects for implementation in the near future.

The plan will be developed over the next four months with anticipated completion in March, 2009.

## We want your input!

Watch for future e-mail newsletters requesting web-based feedback in December 2008 and February 2009 and plan on attending a community open house to review the draft plan in February 2009.
